

Colouring preparations

Abstract

5 The present invention relates to colorant preparations comprising

- a) at least one colorant in particulate form,
- b) at least one organic solvent having a boiling point of at least 247°C, measured at atmospheric pressure, and

10 c) water,

and less than 0.25% by weight of

organic solvents having a boiling point below 247°C, measured at atmospheric pressure
